Current Address: B-3310, Tiger Al Qadesia, Al Nahda, Sharjah-Dubai Border, Dubai, United Arab Emirates

Phone: +971-525670667 | +91-9940199083 | **Email:** d.shankarnarayana@gmail.com | **Web:** <https://sh4.in>

Objective

12 years of experience in the Information Technology & Information Security sector, open to extreme eccentric challenges.

Possess phenomenal expertise on penetration testing (red team) and secure coding practices.

Achievements

Appreciation from the President of India, Late Hon. Dr. A.P.J. Abdul Kalam on reporting security vulnerability in <http://india.gov.in> where an attacker could traverse and download any file of his/her choice from the portal as well as from the internal file system.

Certifications

Offensive Security Certified Professional (OSCP), August 2015

Certified Ethical Hacker v8 (CEH), May 2015

Patents

Method to detect, warn, track, alert & prevent hackers simultaneously from websites instantly.

Patent Grant No: 263968 | Application No: 2357/CHE/2008

Patent Filed: 2008 | Patent Published: 2010 | **Patent Granted: 2014**

Education

2002 – 2007, College of Engineering, Guindy – Anna University, Chennai, Tamilnadu
M.Sc. 5yr (Integrated) Information Technology – Course Completed

2001 – 2002, VMHS School, Chennai, Tamilnadu
High School Secondary, PUC – Computer Science - 89%

July 2018 – Present, **Emirates Integrated Telecommunications Company, Dubai, UAE**
Security Engineer, <http://www.du.ae>

Du's official name is Emirates Integrated Telecommunications Company (EITC). It was commercially branded as du in February 2007. The company had 4.5 million subscribers as of the end of March, 2011. The company launched mobile telecommunication services in February of 2007 across the UAE.

Responsibilities:

- Evading real-time DDoS attacks and re-routing the legitimate traffic towards the client environment to achieve 100% uptime and availability.
- Also, involved in VAPT engagements on the web applications and infrastructural environment and assets.
- Source Code Reviews and Performance Testing.

December 2015 – June 2018, **CohnReznick Professional Services, (Advisory Group), Chennai, INDIA**
Information Security Consultant, <http://www.cohnreznick.com>

CohnReznick is the tenth largest public accounting firm in the United States based on aggregated 2013 revenues. Its services are aligned in three segments: accounting, tax, and advisory. It has 26 offices, 2,500 employees as of May 1, 2014, and reported annual revenue of \$508 million.

Working as a red-teamer doing vulnerability assessments and penetration testing on the client's environment, providing detailed remediation for the same. Also, involved in developing tools and scripts that aids in the VA/PT process.

Roles and responsibilities include -

- **Core day-to-day process would be engaging with the client on vulnerability management process through cloud environments.** Tests comes in a variety of Black-Box/ White-Box from the clients for VAPT process. This mainly involves effectively finding hidden vulnerabilities, categorizing them per the risk factor and suggesting remediation to the client.
- **Configured and worked on multiple SIEM** (Security Information and Event Management) products like AlienVault, CarbonBlack and SS8 for different client environments.
- Simulated phishing attacks on the client environment and generated a report to the CISO that gives a summary on the baited employees.
- **Developed a security scanning tool** that swiftly aids in the VAPT process and currently working on parallel processing procedures to make the scanner faster. Software: <https://github.com/skavngnr/rapidscan>
- Worked on **configuring hardware and software web application firewalls** like DotDefender, PHP-IDS

May 2014 – December 2015, **Twenty19, Chennai, INDIA**
Chief Technology Officer (CTO), <http://www.twenty19.com>

Twenty19 is one of the first Indian portals that connects students and companies through internships virtually and also provides an online learning platform. As of 2015, the current student registrations were around 0.4 million and company registrations at 10.5K.

We got featured on CNBC-TV18.

<http://www.moneycontrol.com/news/business/cnbc-tv18-comments/twenty19com-talent-pool-for-start-up-companies-1488405.html>

Steered the technical modules of the portal from server management to secure code development, followed by periodical penetration tests and vulnerability assessments. My responsibilities and roles include -

- Team management & highly responsible for getting tasks launched before deadline.
- Developed a red lab (sandbox) setup such that all
- Periodic penetration tests & vulnerability assessments as new features gets launched.
- Developed a multitude of new additions like search engine, notifications, live feeds, search engine optimizations, etc.
- Secure code review of the legacy codebase and remediation for the same.
- Drastically improved the performance of the portal in terms of faster load times by caching and query optimizations.

August 2011 – May 2014, **DevCare Solutions, Chennai, INDIA**

Technology Lead, <http://www.devcare.com>

DevCare Solutions helps customers enhance their investment in IT initiatives providing dedicated bandwidths to each of its specialized areas, viz., information security, software consulting, programming, analysis and design, system planning, application development, database administration, professional web design, application hosting, website creation, and network management. Managed a team of people in leading and developing web and mobile applications that follows a secure code methodology.

- Remote security testing and penetration testing of the client websites.
- Reporting of vulnerabilities and remediation.
- Secure code development of 1-on-1 video conferencing module for both web and mobile / development of various features for the clients of the company.

September 2009 – July 2011, **SignalHack, Chennai, INDIA**

Chief Architect, Real-Time Web IDS

A real-time web Intrusion Detection Service (IDS) that was built using the idea of my patent (Please refer above for the patent number & information). This software was developed over the years and was rotated as a beta release to many websites during this period 2009 - 2011. Software is still under development and in a beta-phase till date.

- Penetration testing was done prior to installation of the product, as it is just an IDS.
- Software recognizes hacker attack patterns immediately and alerts the administrator of the website when an attacker is trying to break into the website.
- Uses Twilio SMS API to send short text messages to administrators of the attempts and hacker whereabouts.

August 2007 – March 2009, **Dfianz Security, (SGS Technologie), Chennai, INDIA**

Director, <http://www.netandhost.com>

Netandhost, a part of the SGS Technologie which is India's most forward looking and most trusted business group having main markets in USA, UK, Europe and Asia. For over 25 years the SGS name has stood for Leadership with Trust and has been synonymous with excellence and ethical business practices which serve as the guiding principles for every enterprise within the group. The SGS Technologie and its subsidiaries continues to be amongst the pioneer movers in the emerging businesses and technologies.

Dfianz Security was started by SGS Technologie (max shares) and myself (minimum shares). It was a written contract between the two parties in development of an online security software that scans and reports some of the most important Open Web Application Security Project (OWASP) top 10 vulnerabilities.

- The software perfectly lists out SQLi in both forms and URL, XSS in both forms and URL, sensitive files and directories, Enumerates users, etc.
- Also checks for directory traversal attacks, path disclosure, broken links and other factors.
- A separate internal panel was built such that all these findings gets automatically recorded as a report.
- The software was successfully completed, tested and submitted to SGS Technologie during March 2009.

Experience

January 2007 – May 2007, **Larsen & Toubro Limited, Chennai, INDIA**
